

OSI to provide TDNS for the Royal Swedish Navy A26 Submarine Program

Burnaby, BC, December 1, 2015 - OSI Maritime Systems (OSI) is pleased to announce that the company has been selected by Saab to deliver Tactical Dived Navigation Systems (TDNS) for the Royal Swedish Navy's two new A26 submarines.

The A26 submarine for the Royal Swedish Navy is the world's most modern submarine program, and as part of the agreement, OSI will design, build, integrate and set to work a system for each submarine.

OSI's TDNS is designed specifically for subsurface platforms. TDNS features a bespoke hardware design and the full operational capability offered by OSI's ECPINS Submarine, which has been independently certified against NATO WECDIS STANAG 4564. TDNS will also be closely interfaced with other submarines' systems and sensors.

OSI's world leading dived navigation solutions are deployed with the navies of the UK, Australia, Canada, Netherlands, South Africa, Portugal, Brazil and Sweden.

About OSI

OSI Maritime Systems has been providing advanced integrated navigation and tactical solutions to military customers for over 20 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 20 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
