OSI Maritime Systems in discussion with CYBICOM Atlas Defence to provide in country support for integration of OSI INBS and WECDIS Systems

Burnaby, BC, Canada - OSI Maritime Systems (OSI) has announced discussions are underway with CYBICOM Atlas Defence (CAD) of South Africa, to provide in-country support for the integration of OSI's Integrated Navigation Bridge System (INBS) and WECDIS Systems.

OSI is looking to the present and future opportunities in South Africa and the increasing need for companies to ensure there is sufficient and competent in-country support. In order to meet this need, OSI is in discussions with CAD to fulfil the key service of being the in-country support partner, to provide local knowledge, technical advice, and project assistance to ensure the success of OSI INBS and WECDIS Systems.

OSI has been actively pursuing opportunities with the South African Navy for many years. With the adoption within the PLANCOM of our Flagship WECDIS product, ECPINS Submarine, OSI has now taken steps to identify the right in-country support partner.

"CAD presents a nimble, dynamic, and effective support partner. We're extremely pleased to be furthering our discussions," said Ken Kirkpatrick, President and CEO.

About OSI

OSI Maritime Systems has been providing advanced integrated navigation and tactical solutions to military customers for over 20 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 20 naval customers from around the world with over 600 warships and submarines operating with its world leading integrated navigation and tactical solutions.
