For Immediate Release

**OSI Maritime Systems Announces the Release of ECPINS® 6.0 and Royal Navy Fleet-Wide Deployment**

OSI Maritime Systems announced the release of ECPINS 6.0 for Warships (ECPINS-W) and Submarines (ECPINS-W Sub). In addition, the release coincides with the Royal Navy's fleet-wide deployment of ECPINS.

ECPINS 6.0 delivers the most advanced navigation and tactical capabilities for surface and subsurface naval operations. As the company's latest and most advanced product, it offers significant enhanced capabilities including leading-edge 3D imagery, networking capabilities, and upgraded dived navigation. Further, ECPINS 6.0 has achieved International Maritime Organization (IMO) ECDIS certification, and it is the only product formally tested by a recognized certification body that is fully compliant to the NATO STANAG 4564 Edition 2 WECDIS standard.

The UK Royal Navy will be the company's first customer to upgrade to ECPINS 6.0. The software upgrade will be implemented across systems currently operating on approximately 75 warships and submarines.

**About OSI**

OSI Maritime Systems is a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 16 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
