OSI Maritime Systems to Provide Maritime Security System for the UK 2012 Olympics

OSI Maritime Systems is pleased to announce that it provided the Dorset Police Authority and UK Navy with OSI's Tactical Asset and Control Tracking System (T-ACT). T-ACT was integral in ensuring the sailing events at Weymouth and Portland were safe and secure environments for competitors, spectators, media, security teams and all others involved.

T-ACT is a versatile and fully scalable maritime, air, or shore base system, that leverages the information gained through AIS, as well as the tactical support functions available in OSI's navigation and operational support software. This combination provides a dynamic means of capturing and sharing the complex situational awareness picture, as well as tactically employing assets such as small craft (LCVPs, LCUs and Riverine) RHIBs and similar fast boats as well as helicopters for heightened maritime security.

About OSI

OSI Maritime Systems is a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 16 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
