For Immediate Release

**OSI Maritime Systems Signs Contract to Integrate ECPINS-W Sub into the UK Royal Navy T45 Destroyer Integrated Bridge System**

**Burnaby, BC, Canada** - OSI Maritime Systems (OSI) is pleased to announce the signing of a contract to integrate its flagship software, ECPINS-W Sub, into the UK Royal Navy's T45 Destroyer Integrated Bridge System (IBS).

Under the terms of this contract, OSI will provide software engineering activity to fully integrate ECPINS into the existing IBS system architecture.

OSI supplies the Royal Navy with its advanced NATO WECDIS STANAG 4564 certified ECPINS-W Sub software across all operational ships, submarines, shore headquarters, and training establishments. Also, as the Prime Contractor for the Royal Navy Warship AIS program, OSI has further systems deployed across the Fleet and is providing a fully Integrated Logistics Support service for 20 years. This new contract, for the integration of ECPINS into an existing IBS, confirms the Royal Navy's long-term commitment to the company and its technology.

OSI recently announced the signing of contract with the Royal Canadian Navy to provide a software upgrade and in-service support for the software that is deployed across their fleet of warships and submarines.

**About OSI**

OSI Maritime Systems has been providing advanced integrated navigation and tactical solutions to military customers for over 20 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 16 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
