For Immediate Release

**OSI Maritime Systems Signs Contract with the Royal New Zealand Navy to Provide In-Service-Support for 13 Years**

**Burnaby, BC, Canada** - OSI Maritime Systems (OSI) is pleased to announce that it has signed a contract to provide in-service-support for the Integrated Navigation and Bridge Systems (INTS) that the company has delivered and installed across the Royal New Zealand Navy fleet.

Under the terms of this contract, OSI will act as the design authority, and provide software and hardware upgrades, engineering support, and training services.

OSI has been supporting the Royal New Zealand Navy warship integrated navigation system requirements since 2003 and the recent 13-year in-service-support contract confirms the Navy's long-term commitment to the company and its technology.

OSI recently announced the signing of a contract with the Royal Australian Navy and Royal Canadian Navy to provide in-service-support for the company's world leading ECPINS-W software, installed across their fleet of warships and submarines.

**About OSI**

OSI Maritime Systems has been providing advanced integrated navigation and tactical solutions to military customers for over 20 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 16 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
