For Immediate Release

OSI Signs Contract with the Irish Naval Service to Provide Fleet-Wide WECDIS Solution

Burnaby, BC, Canada - OSI Maritime Systems (OSI) is pleased to announce the signing of a contract with the Irish Naval Service to deliver warship navigation systems, including OSI's flagship ECPINS-W (Warship) software.

Under the terms of this contract, OSI will provide engineering services, ship systems, operator training systems, and installation services. OSI systems will be installed on the entire Naval Service fleet.

The company is proud to have the Naval Service as a customer and looks forward to building a long and successful relationship with this distinguished organization.

ECPINS-W is the only software certified by an International Association of Classification Societies approved body against the NATO WECDIS STANAG 4564.

About OSI

OSI Maritime Systems has been providing advanced integrated navigation and tactical solutions to military customers for over 20 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 19 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
