For Immediate Release

## **OSI Signs Contract to Provide the South African Navy with T-ACT Systems**

**Burnaby, BC, Canada** - OSI Maritime Systems (OSI) is pleased to announce the awarding of a contract to provide the South African Navy with Tactical-Asset Control and Tracking Systems (T-ACT) that will be installed on rigid-hull inflatable boats to support maritime security operations.

T-ACT is a navigation and command, control and communication suite designed for small craft operations, including maritime and boarder security agencies. Versatile and fully scalable, T-ACT is a small craft HMI embedded with ECPINS Small Craft - a variant of ECPINS designed specifically for use in confined space environments and with an emphasis on tactical navigation functionality. Combined with a secure data link, communication is enabled beyond-line-of-sight between mother ships and small craft.

### **About OSI**

OSI Maritime Systems has been providing advanced integrated navigation and tactical solutions to military customers for over 20 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 19 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
