For Immediate Release

OSI Maritime Systems Displays Navigation & Tactical Solutions at LIMA Exposition

Burnaby, BC - OSI Maritime Systems' (OSI) exhibit will feature a range of the Company's leading naval integrated navigation and tactical solutions at the Langkawi International Maritime & Aerospace Exhibition (LIMA), March 17 – 21, 2015, in Langkawi, Malaysia.

As part of the exhibit, OSI's Electronic Chart Precise Integrated Navigation System (ECPINS®) Warship (W) will be displayed. ECPINS W is an International Maritime Organization (IMO) Approved ECDIS - the only ECDIS independently certified against NATO WECDIS STANAG 4564 - designed for the harsh, time critical environment of military navigation.

In addition to ECPINS, OSI will be featuring INTS (Integrated Navigation & Tactical System), and T-ACT (Tactical Asset Control & Tracking). Incorporated into the RMN's LCS program, INTS is a fully scalable tactical navigation solution built for surface and subsurface platforms. T-ACT is an afloat and ashore command and control solution for naval and security operations, designed to optimize small-craft deployment.

Visit OSI at Booth C1109.

About OSI

OSI Maritime Systems has been providing advanced integrated navigation and tactical solutions to military customers for over 20 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 19 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
