

OSI Selected by Lockheed Martin to deliver IBNS for the Royal Saudi Navy's MMSC Program

May 1, 2018 – Burnaby, BC - OSI Maritime Systems (OSI) announced the signing of a contract with Lockheed Martin to provide its Integrated Bridge and Navigation System (IBNS) for the first four ships of the Royal Saudi Navy's (RSN) Multi-Mission Surface Combatant (MMSC) program.

OSI will build and deliver a military grade system for the MMSC program based on the system designed for the U.S. Navy Freedom-variant Littoral Combat Ship (LCS) program.

The company was awarded the LCS-27 contract by Lockheed Martin in November 2017.

"We are pleased to have the opportunity to support Lockheed Martin with this important project, and equally proud of the working relationship we have with this prime in other programs," said Ken Kirkpatrick, President and CEO. "MMSC is our first RSN related project, and we look forward to future success in expanding our business in this large market."

As a company that is exclusively focused on the naval market, OSI's IBNS is designed and built specifically for warships and meets stringent military specification demanded by both the USN and RSN.
