

## OSI's Wins Second Chilean Navy Upgrade Program

### OSI Expanding its South American Presence

- OSI's second submarine upgrade program with the Chilean Navy
- OSI's Tactical Dived Navigation System (TDNS) best-in-class technology
- A G2G contract facilitated by CCC

October 18, 2023 -- Burnaby, BC – OSI Maritime Systems (OSI) is pleased to announce a contract to support the Chilean Navy's Scorpene-class upgrade program.

The contract includes the delivery of OSI's TDNS D-MOP system and has been facilitated through a government-to-government (G2G) contract between CCC and the Chilean Navy. The first contract, signed in 2020, provided upgrades to the navigation capability of two Thompson-class submarines.

Ken Kirkpatrick, President and CEO, OSI Maritime Systems commented, "We're proud of the work we are doing with the Chilean Navy. The success of the first contract paved the way for this subsequent agreement with the Navy; they know that we can deliver and that their submarines will be navigating with the best-dived solution available."

Part of the design includes a Digital Maritime Operations Plot (D-MOP) with advanced ECPINS Submarine software to deliver a state-of-the-art tactical navigation advantage. In a submarine, where operating space is confined, the D-MOP's hardware and flexible system architecture are fitted to maximize and efficiently deliver navigational and tactical advantage to the crew.

"As a result of this contract, OSI's footprint is growing in South America as well as the number of submarines operating TDNS," stated Jim Davison, VP Business Development, OSI Maritime Systems. "We have an impressive record with our systems operational on over 60 NATO and Allied submarines and 15 classes."

Independently certified against NATO WECDIS STANAG 4564, OSI solutions are deployed on Sweden, UK, Australia, Canada, The Netherlands, Indonesia, South Africa and Brazil submarines.

#### About CCC

The Canadian Commercial Corporation (CCC) is Canada's government to government contracting agency. We help build successful commercial relationships between Canadian businesses and governments around the world through our government to government contracting approach. We are also the Government of Canada's designated contracting authority for U.S. DoD requirements from Canada. To learn more about how we have facilitated billions in trade between Canadian businesses and governments around the world, visit [www.ccc.ca](http://www.ccc.ca).

#### About OSI

OSI Maritime Systems, has been providing advanced integrated navigation and tactical solutions to military customers for over 20 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 25 naval customers from around the world with more than 700 warships and submarines operating with its world leading integrated navigation and tactical solutions.
