For Immediate Release

OSI Maritime Systems Successfully Passes Factory Acceptance Test (FAT) for Integrated Navigation and Tactical System (INTS) for the New Zealand Navy Anzac Frigates Upgrade Program

OSI Maritime Systems (OSI) is proud to announce the successful completion of the Factory Acceptance Test (FAT) for its Integrated Navigation and Tactical System (INTS). The INTS will be installed on two of the Royal New Zealand Navy's Anzac Frigates.

OSI's INTS is a fully scalable, IMO and NATO STANAG 4564 compliant Integrated Bridge System that offers a flexible design able to meet the requirements of the most demanding military environments. Centred around OSI's ECPINS and integrates selected radars and navigation sensors, INTS provides a comprehensive and cost effective IBS.

About OSI

OSI Maritime Systems is a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 16 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
