For Immediate Release

OSI Maritime Systems Displays Navigation & Tactical Solutions at Sea-Air-Space Exposition

Burnaby, BC - OSI Maritime Systems (OSI) exhibit will feature a range of the Company's leading naval integrated navigation and tactical solutions at the Navy League's annual Sea-Air-Space Exposition, April 7-9, at the Gaylord National Resort and Convention Center in National Harbor, Maryland.

As part of the exhibit, OSI's ECPINS® (Electronic Chart Precise Integrated Navigation System – Warship) will be displayed. ECPINS is an International Maritime Organization (IMO) Approved ECDIS - the only ECDIS independently certified against NATO WECDIS STANAG 4564 - designed for the harsh, time critical environment of military navigators.

In addition to ECPINS, other OSI solutions will be displayed including INTS (Integrated Navigation & Tactical System), a fully scalable tactical navigation solution built for surface and subsurface platforms, and T-ACT (Tactical Asset Control & Tracking), afloat and ashore command and control solutions for naval and security operations, designed to optimize small-craft deployment.

About OSI

Based in Burnaby, BC, OSI Maritime Systems has been providing advanced integrated navigation and tactical solutions to military and commercial customers for over 35 years. As a pioneer of Warship Electronic Chart Display and Information Systems (WECDIS), the company has grown to be a leading provider of integrated navigation and tactical solutions designed for naval and maritime security operations. The company develops and delivers integrated bridge systems for warships, integrated dived navigation systems for submarines, and C2 systems for small craft. OSI currently has 16 naval customers from around the world with over 500 warships and submarines operating with its world leading integrated navigation and tactical solutions.
